M. E. ANDERSON

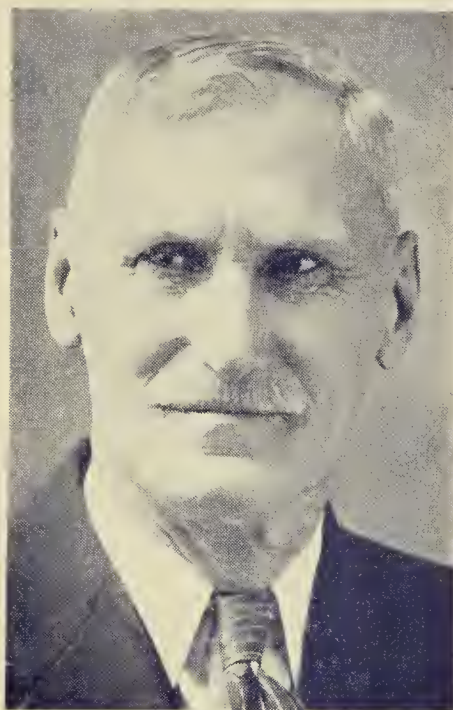

SCIENTIFIC RESEARCH

Of ever increasing importance is the Laboratory and the Greenhouse where year around experiments can be made with the object of developing disease free or resistant strains of peas, beans and corn; so necessary to the production of quality seeds.

This department is being most capably handled by Dr. M. E. Anderson, Plant Pathologist, who received his degree and initial training at the University of Wisconsin.

BURT GILBO

RAY FERGUSON

BREEDING

This work — in which experience means so much — is in charge of Mr. Burt Gilbo, who has spent 55 years in seed breeding, of which 33 have been in our own employ.

Mr. Gilbo has an able assistant in Mr. M. R. Ferguson, who has 21 years in our service to his credit.

Pods—3½ in. flat, curved, 2 to 4 beans
Seed—Small, white, flat, 75 per oz.
Season—65 days

SWEET CORN

Pounds

Price

*CHAPMAN'S GOLDEN (Northern Grown)

Ears—8 in. long, 10-14 rows of med. golden kernels
 Stalk—5 to 6 ft. sturdy, similar to Golden Cross stalk
 Season—Slightly earlier than Golden Cross
 86 to 90 days. New corn, well received

*BURBANK BANTAM (Northern)

Ears—7 to 8 in long, 12 to 14 rows of deep yellow kernels. Equal in flavor to eight row Bantam
 Stalk—5 to 6 ft.
 Season—80 to 85 days. Excellent for whole kernel pack, or market garden use. Gaining favor,

*BURBANK BANTAM TOP CROSS HYBRID (Northern)

Ears—8 to 9 in. long, 12 to 14 rows of well colored yellow kernels. Fine flavor.
 Stalk—5 to 6 ft. thrifty, vigorous
 Season—86 to 90 days. Nice uniformity, resistant and hardy. Is repeating where tried by canners and market gardeners.

COUNTRY GENTLEMAN (Northern or Central)

Ears—7 to 8 in. long, cob small covered with long, slender white kernels, without row formation
 Stalk—6 to 7 ft.
 Season—95 to 105 days. Slightly later than Stowells Evergreen. An especially fine strain with excellent quality, selected for evenness of maturity.

CROSBY, MINNESOTA 287 (Northern)

Ears—6 to 7 in. long, 16 rows of short sweet tender white kernels
 Stalk—5 to 5½ ft. ears well up, taller stalk than Maine Crosby.
 Season—80 to 84 days, selected for earliness and uniformity. This is a well known strain for canning.

EARLY EVERGREEN (Northern or Central)

Ears—8 in. long, 14 to 18 rows of white sweet tender kernels.
 Stalk—6 to 7 ft.
 Season—90 to 95 days. A good white corn especially for the more northern districts. Selected and bred toward better uniformity

GOLDEN BANTAM (Northern)

Ears—6 to 7 in. long, 8 rows of rather broad deep yellow kernels. Flavor exceptionally rich.
 Stalk—4 to 5 ft.
 Season—80 to 83 days. A strong hardy strain, approved by canner and market gardener for its quality and yielding ability.

BURBANK BANTAM

GOLDEN CROSS HYBRID

SWEET CORN

Pounds

Price

*GOLDEN CROSS HYBRID (Northern)

Ears—8 to 10 in. long, 10 to 14 rows of light golden kernels. Fine flavor and quality.

Stalk—5 to 6 ft. dark foliage

Season—85 to 90 days. Very uniform in both ear size and maturity. A popular hybrid produced by crossing pure lines of Purdue Bantam and Purdue Inbred No. 51. Selected toward earliness.

GOLDEN OR BANTAM

EVERGREEN (Northern)

Ears—9 in. long, 12-14 rows of kernels, general appearance of Stowells, except is Yellow color. Flavor better than Stowells.

Stalk—6-7 ft.

Season—85-90 days.

GOLDEN GIANT (Northern)

Ears—7-8 in. long, 10-14 rows of kernels, pointed and unusually smaller than Bantam.

Stalk—4-5 ft.

Season—80-85 days. A cross between Howling Mob and Golden Bantam.

GOLDEN SUNSHINE (Northern)

Ears—6-7 in. long, 10-12 rows of light yellow kernels.

Stalk—4-5 ft.

Season—72-76 days.

Market and home gardeners.

NARROW GRAIN EVERGREEN

(Northern or Central)

Ears—8-9 in. long, 18-20 rows of deep narrow white kernels. Fine quality.

Stalk—6-7 ft. Same appearance as Stowells.

Season—95-105 days, slightly earlier than Stowells. Carefully selected for uniformity and yield. A superior strain.

SIXTY DAY GOLDEN (Northern)

Ears—6-7 in. 10-12 rows of golden kernels, ear slightly pointed.

Stalk—3 ft.

Season—60 days. Plant on best soils, good quality, very early, and repeating with market gardeners. This is a cross between Golden Bantam and 60 Day White.

SIXTY DAY WHITE (Northern)

Ears—6-7 in. 10-12 rows of white kernels of good quality.

Stalk—3 ft.

Season—60 days. Selected from many early strains of white corn because of its quality and satisfactory yield when planted in good soil.

SWEET CORN

Pounds

Price

STOWELLS EVERGREEN

(Northern or Central)

Ear—8-9 in. long, 16 rows deep, white kernels, of good quality and sweetness.

Stalk—7 ft. sturdy growth.

Season—95-105 days. Very popular late sort. This strain bred for a slightly more narrow kernel and better uniformity than the old strains. Approved by canners and market gardeners.

WHIPPLES EARLY YELLOW

(Northern)

Ear—7-8 in. long, 12-16 rows of broad deep kernels. Very sweet, fine quality.

Stalk—6 ft.

Season—78-82 days. In demand by market gardeners.

Our own planting stock of each variety is carefully selected from the fields at the canning stage. Propagation plots of inbreds are thoroughly rogued. Earliness, type, uniformity, stalk, and shank length receive careful consideration. Our annual program of hybridizing and top crossing will be continued with increased production of those varieties accepted and approved by the canning and market garden trades. Our facilities for handling sweet corn seed production have been greatly increased for the start of the 1935 season.

IN this little booklet we have combined a ready reference of the main characteristics of the seeds we grow together with a convenient form for your use in requesting our quotations for prompt shipment or future contract delivery.

Please insert in the left hand column the number of pounds of each variety on which you wish quotation, and do not fail to sign in the place provided on the last page—your firm's name, your post office address, and the point to which shipment would be made.

Mail the book to us—it will be promptly priced and returned together with another copy for your future use.
